

END OF LIFE NOTICE

Effective January 5th, 2009, Arista Corporation announces the end of life (EOL) status for the BoxPC 201H-ACP. This model has been replaced by more robust fanless units. Arista will continue to provide warranty, repair and support services in accordance with the product warranty policy.

Replacement Units

Replacement units for the BoxPC 201H-ACP include the BoxPC 140A-ACP and BoxPC 240A-ACP Fanless ThinManger Enabled Multi-Monitor Industrial Computers. As highlighted below, these units offer new design features and 100% fanless operations.

**BoxPC 140A-ACP Overview**

The BoxPC 140A-ACP is packed with industry leading design features. Constructed of an all metal chassis, the design offers protection against humidity and particulate matter ingress. The BoxPC 140A-CP offers maximum industrial connectivity, including two redundant Gigabit Ethernet ports, four USB 2.0 ports, five RS-232 COM ports, one RS-232/422/485 COM port, up to three 1600 x 1200 VGA ports, one LPT printer port, one set of audio connections and separate KB and MS connectors. Unique to this unit is the ability to deploying up to three multi-monitor touch screens. The unit offers external access to a CF Type II slot through a separate sealed access panel. To protect against cable disconnection due to high vibration, all vital I/O connections are screw-in, clip-in and secured, including a unique screw-in power connector.

The BoxPC 140A-ACP is available in two configurations:

- the BoxPC 140A-ACP which features one VGA output and one open PCI slot
- the BoxPC 140A-ACP-3 which adds two VGA outputs via one add-on PCI card and has no open PCI slot (total 3 monitors)

BoxPC 240A-ACP Overview

The BoxPC 240A offers maximum industrial connectivity, including two redundant Gigabit Ethernet ports, four USB 2.0 ports, five RS-232 COM ports, one RS-232/422/485 COM port, up to five 1600 x 1200 VGA ports, one LPT printer port, one set of audio connections and separate KB and MS connectors. Unique to this unit is the ability to deploying up to five multi-monitor touch screens. The unit offers external access to a CF Type II slot through a separate sealed access panel. To protect against cable disconnection due to high vibration, all vital I/O connections are screw-in, clip-in and secured, including a unique screw-in power connector.

The BoxPC 240A-ACP is available in three configurations:

- the BoxPC 240A-ACP which features one VGA output and two open PCI slot
- the BoxPC 240A-ACP-3 which adds two VGA outputs via one add-on PCI card and has one open PCI slot (total 3 monitors)
